## Percona Server for MongoDB® provides:

- All features and benefits of MongoDB® 3.4 Community Server.
- MongoDB® distributed MMAP v1 and WiredTiger storage engines
- Optional **RocksDB** (</services/support/rocksdb-support>) and Percona Memory Engine storage engines
- Full online backup support for PerconaFT® and MongoRocks
- Integrated open source hot backup system for WiredTiger and MongoRocks
- SASL Authentication plugin, enabling authentication through OpenLDAP or Active Directory.
- Audit plugin, providing the ability to track and query database interactions of users or applications

## How Percona can help

Percona can help you determine if Percona Server for MongoDB® is the right solution for your company and if it is, help with your deployment, while ensuring optimal performance. Enterprise-class Percona Support (</services/support/mysql-support>) is available 24/7 to answer all your questions, ensure your deployment runs as expected, and help you in a crisis.

To discuss how Percona can help you make your Percona Server for MongoDB® deployment a success, please call us at +1-888-316-9775 (tel:+1-888-316-9775) (USA), +44 203 608 6727 (tel:+44 203 608 6727) (Europe), or have us contact you. (<http://learn.percona.com/contact-me>)
