Welcome to dionaea's documentation!

Dionaea is meant to be a nepenthes successor, embedding python as scripting language, using libemu to detect shellcodes, supporting ipv6 and tls

Warning

The documentation is work in progress.

Content:

- Introduction
 - How it works
 - Security
 - Network Connectivity
- Installation
 - Arch Linux
 - o Ubuntu 14.04
 - 3rd-party packages
- Configuration
 - o dionaea
 - Logging
 - Modules
 - Processors
- Running dionaea
- Modules
 - o curl
